Farmingdale, N. Y. 11735

It's quite common for every business to receive letters of complaint. I suppose it's human nature to complain about things that aren't right and overlook outstanding work as merely acceptable. However, once in a while it's nice to hear something good.

The spiral cooler we purchased from you has been running 16 hours a day for about 5 months now without a minutes down time. As you know we installed the system in 3 days (something of a record) and when we started up we never lost one row of cookies.

In short, everything worked, and continues to work perfectly. I thought you and your employees would like to know how pleased we are with your product. Please accept our thanks for a job well done. Kindest regards to all.

Cordially,

Jerry Voshel
Chief Engineer
