

POWERWASH 2000

Portable, High Pressure Washing System

FLEXIBILITY

The POWERWASH® 2000 may be used in both Automatic and Manual Mode. In Automatic Mode, the POWERWASH® 2000 becomes an integral part of the IJ White In-line CIP Belt Washing Station, providing 500 psi cleaning of the belt. Portable, with quick-release disconnects, the system may also be used with multiple CIP Belt-Washing Stations on the same production line or throughout the plant.

In the Manual Mode, plant personnel can use the POWERWASH® 2000 to easily clean the entire processing area. The system comes with two high-pressure hoses and one sanitation wand for complete foaming, rinsing, and sanitizing.

ECONOMY

The POWERWASH® 2000 conserves water and lowers energy consumption. A high-efficiency 5 HP motor, coupled with a positive displacement pump, reduces water usage while providing maximum pressure.

TECHNICAL SUPPORT

Every POWERWASH® 2000 includes a comprehensive Operations Manual. IJ White's Technical Support Department provides a complete warranty, with 24-hour parts shipment and on-site service.

The POWERWASH® 2000 is a portable high-pressure washing system engineered to meet today's demanding requirements for improved sanitation in food processing plants. In one compact, all stainless steel system, the POWERWASH® 2000 ensures optimal hygiene with three complete wash cycles: Foam, Rinse and Sanitize.

POWERWASH 2000

Technical Data

SPECIFICATIONS

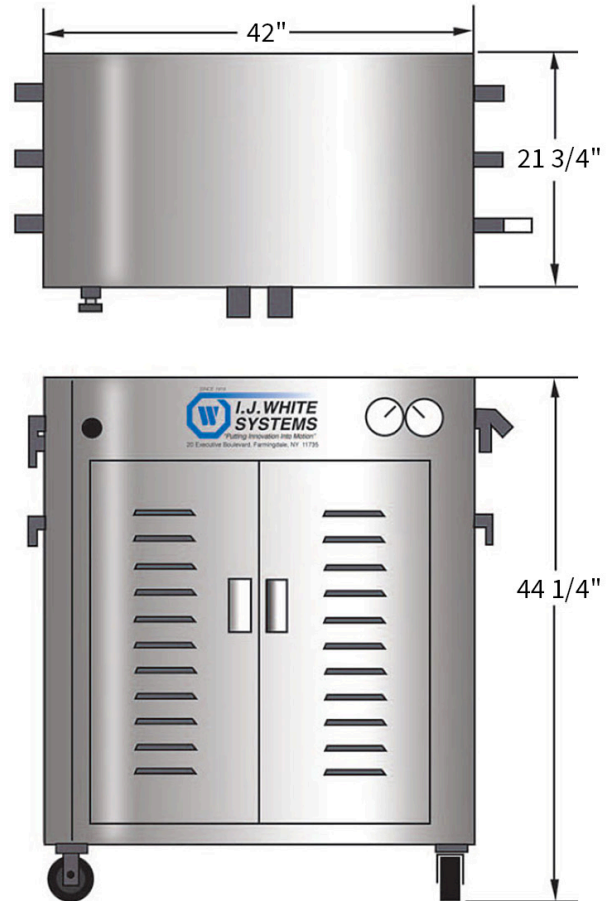

- Capacity: 4 to 12 GPM
- Pressure: 500 psi (option to 3,000 psi)
- Pump, Triplex, Positive Displacement
- Stainless Steel Wet Section
- Temperature Rated to +140° F (+60° C)
- Motor: 5-7.5 HP
- Low Water Safety Shut-off
- Overload Protection
- Low Voltage Controls
- 220/400/460/575 V, 3 PH

FEATURES

- All Stainless Steel Construction
- Power On/Off Switch
- Glycerine-filled Pressure Gauge
- Water Temperature Gauge
- Quick Disconnects
- Locking Storage Department
- Portable on Stainless Casters
- Multiple Discharge Ports

EQUIPMENT

- One 25', 1/2" High Pressure Hose
- One 75', 1/2" High Pressure Hose
- One Sanitizing Wand
- One Safety Gun with 6" Barrel
- 48" Under-belt Safety Rinse Gun
- One Stainless Steel Reservoir (30 gal)
- One Stainless Steel Chemical Tank (6 gal)
