## TRACK GLIDE Z-6000 PERFORMANCE UPGRADE RETROFIT

### TRACK GLIDE Z-6000:

This latest technology dramatically improves the belt performance and lowers tension in spiral systems. TRACK GLIDE applies food grade silicone to the belt track at multiple points throughout the system. The system significantly reduces friction and increases spiral belt life. This PLC controlled package reduces the potential for product contamination while decreasing maintenance cost and the labor needed for traditional brush lubrication.

### BENEFITS:

- Reduces Residue Buildup
- Reduces Product Contamination
- Dramatically Reduces Friction
- Lowers Belt Tension
- Increases Belt Life
- Lowers Maintenance Cost
- Reduces Cleaning Time and Cost
- Uses Less Silicone Lubricant

### FEATURES:

- Focused In-Line Application
- Direct Onto the Track
- Applies Lubricant Uniformly
- PLC Controlled Even Flow
- Up to Six (6) Point Locations
- Plastic & Stainless Belts
- Auto Reservoir Alert
- Less Residue Build-Up

### SCOPE OF SUPPLY:

- All necessary Components and Parts
- Program Upgrades for your PLC
- Includes Installation Video and Instructions
- IJ White On-Line Support Post Installation
