AUTO PRESSURIZATION SYSTEM (APS) PERFORMANCE UPGRADE RETROFIT

AUTO PRESSURIZATION SYSTEM (APS):

This system reduces warm moist air infiltrating into and cold air exiting out of the Blast Freezer, extending the time between defrosts and keeps the refrigeration coils running more efficiently. As a result this system saves energy, reduces maintenance costs, and increases production availability.

APS BENEFITS:

- Increase Production Availability
- Reduces Maintenance Costs
- Saves Energy by Improving Efficiency
- Improves Air & Product Quality Inside the Freezer

APS FEATURES:

- Drastically Reduces Air Infiltration
- Extended Time Between Defrosts
- PLC Controlled
- Reduces Moisture and Frost on Coils and Conveyors

SCOPE OF SUPPLY:

- All Components and Parts
- Program Upgrades for your PLC
- On-Line Support by IJ White Technicians
